Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Restriction/Lack of Unity discussed. Examiner pointed out that indefiniteness of the claim is what made it possible to apply Mayfield. Applicant says invention is drawn to vector encoding chaperonin and double chain Ig. Applicant will amend the claims to reflect that. Examiner reminded Applicant to keep groups of restriction in mind, as no current claims recite vector with chaperonin and to point to support in specification for recitation of vector encoding a chaperonin and double chain Ig. Examiner also suggested that Applicant amend claims to correct indefiniteness. As Examiner has issued a 408 on the international phase of this application, McBride et al was discussed. Applicant pointed out that pages of McBride et al cited in the 408 are drawn to vector encoding a human growth hormone, not to antibody.
